	ABSTRACT: Various everythness accounts of UFO's are described. It is concluded (that UFO's are a myth. The single and chance appearance)
	investigation. Startescenic photography is not reliable: it is impossible
3 :	simultaneously to follow from two points the accurate outlines of a solld
	It is true that there are pictures which do not raise doubts. They always show objects of round or oval shape with diffused outlines, probably ball
	i lighting. The nature of hall lightning is unknown because of the utter lath of
	information about the time and place of its formation. It cannot be described as being of outerspace origin. Even during superficial analysis, it is found
	that the mysterious flares on clouds are reflections of electric veiding, electric v
